Slim Micro System

Operating Instructions

Made for
iPod  iPhone  iPad
CAUTION
TO PREVENT THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

WARNING
This equipment is not waterproof. To prevent a fire or shock hazard, do not place any container filled with liquid near this equipment (such as a vase or flower pot) or expose it to dripping, splashing, rain or moisture.

WARNING
To prevent a fire hazard, do not place any naked flame sources (such as a lighted candle) on the equipment.

WARNING
Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product, and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered with items (such as newspapers, table-cloths, curtains) or by operating the equipment on thick carpet or a bed.

Operating Environment
Operating environment temperature and humidity: +5 °C to +35 °C (+41 °F to +95 °F); less than 85 %RH (cooling vents not blocked)
Do not install this unit in a poorly ventilated area, or in locations exposed to high humidity or direct sunlight (or strong artificial light).

WARNING
This product is for general household purposes. Any failure due to use for other than household purposes (such as long-term use for business purposes in a restaurant or use in a car or ship) and which requires repair will be charged for even during the warranty period.

CAUTION
The STANDBY/ON switch on this unit will not completely shut off all power from the AC outlet. Since the power cord serves as the main disconnect device for the unit, you will need to unplug it from the AC outlet to shut down all power. Therefore, make sure the unit has been installed so that the power cord can be easily unplugged from the AC outlet in case of an accident. To avoid fire hazard, the power cord should also be unplugged from the AC outlet when left unused for a long period of time (for example, when on vacation).

CAUTION
This product is a class 1 laser product classified under the Safety of laser products, IEC 60825-1:2007.

WARNING
Store small parts out of the reach of children and infants. If accidentally swallowed, contact a doctor immediately.

WARNING
Store the AC adapter out of the reach of children and infants.
The AC adapter cord may accidentally wind around the neck and it may cause suffocation.

When using this product, confirm the safety information shown on the bottom of the unit and the AC adapter label.
AC adapter caution

- Make sure to grasp the body of the AC adapter when removing it from the power outlet. If you pull the power cord, it may become damaged which could lead to fire and/or electrocution.
- Do not attempt to plug in or remove the AC adapter with wet hands. This may result in electrocution.
- Insert the prongs of the AC adapter all the way into the power outlet. If the connection is incomplete, heat may be generated which could lead to fire. Furthermore, contact with the connected prongs of the adapter may result in electrocution.
- Do not insert the AC adapter into a power outlet where the connection remains loose despite inserting the prongs all the way into the outlet. Heat may be generated which could lead to fire. Consult with the retailer or an electrician regarding replacement of the power outlet.
- Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed such that they are not likely to be stepped on. A damaged AC adapter and power cord can cause a fire or give you an electrical shock. Check the AC adapter and the power cord once in a while. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.

Radio wave caution

This unit uses a 2.4 GHz radio wave frequency, which is a band used by other wireless systems (Microwave ovens and Cordless phones, etc.). In this event noise appears in your television image, there is the possibility this unit (including products supported by this unit) is causing signal interference with the antenna input connector of your television, video, satellite tuner, etc. In this event, increase the distance between the antenna input connector and this unit (including products supported by this unit).

- Pioneer is not responsible for any malfunction of the compatible Pioneer product due to communication error/malfunctions associated with your network connection and/or your connected equipment. Please contact your Internet service provider or network device manufacturer.

POWER-CORD CAUTION

Handle the power cord by the plug. Do not pull out the plug by tugging the cord and never touch the power cord when your hands are wet as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed such that they are not likely to be stepped on. A damaged power cord can cause a fire or give you an electrical shock. Check the power cord once in a while. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.
Thank you for buying this Pioneer product.

Please read through these operating instructions so that you will know how to operate your model properly. After you have finished reading the instructions, put them in a safe place for future reference.

Chapter 1:  
Before you start

What’s in the box  
Please confirm that the following accessories are in the box when you open it.  
• Remote control  
• AC adapter  
• AAA batteries (R03) x 2  
• FM wire antenna  
• iPad stand  
• Operating instructions (this document)

Loading the batteries in the remote control  
1  Open the rear lid and load the batteries as illustrated below.

2  Close the rear lid.

The batteries included with the unit have been provided to allow you check product operation and may not last long. We recommend using alkaline batteries that have a longer life.

CAUTION  
• When inserting the batteries, make sure not to damage the springs on the battery’s terminals. This can cause batteries to leak or over heat.

Insert the battery by aligning the pole against the remote control’s terminal

If a battery pushes and bends the terminal out of shape, there is possibility of the alkaline battery shorting out

• Do not use any batteries other than the ones specified. Also, do not use a new battery together with an old one.
• When loading the batteries into the remote control, set them in the proper direction, as indicated by the polarity marks ( and ).
• Do not heat batteries, disassemble them, or throw them into flames or water.
• Batteries may have different voltages, even if they are the same size and shape. Do not use different types of batteries together.
• To prevent leakage of battery fluid, remove the batteries if you do not plan to use the remote control for a long period of time (1 month or more). If the fluid should leak, wipe it carefully off the inside of the case, then insert new batteries. If a battery should leak and the fluid should get on your skin, flush it off with large quantities of water.
• When disposing of used batteries, please comply with governmental regulations or environmental public institution’s rules that apply in your country/area.

WARNING  
Do not use or store batteries in direct sunlight or other excessively hot place, such as inside a car or near a heater. This can cause batteries to leak, overheat, explode or catch fire. It can also reduce the life or performance of batteries.
**Before you start**

**Using the remote control**

The remote has a range of about 7 m at an angle of about 30° from the remote sensor.

![Diagram of remote control range](image)

Keep in mind the following when using the remote control:

- Make sure that there are no obstacles between the remote and the remote sensor on the unit.
- Remote operation may become unreliable if strong sunlight or fluorescent light is shining on the unit’s remote sensor.
- Remote controllers for different devices can interfere with each other. Avoid using remotes for other equipment located close to this unit.
- Replace the batteries when you notice a fall off in the operating range of the remote.

**When moving the unit**

Do not hold the unit by the electric slide CD door when carrying the unit. It could damage the unit.

![Diagram of correct handling](image)
Chapter 2:
Part names and functions

Remote control

1. **STANDBY/ON**
   Switches the receiver between standby and on (page 12).

2. **Input function buttons**
   Use to select the input source to this receiver (pages 16, 17, 21, 23, 25 and 26).

3. **Control buttons**
   - **CLOCK/TIMER**
     Use for setting the clock, as well as for setting and checking the timers (page 12).
   - **SLEEP**
     See Using the sleep timer on page 14.

4. **Numeric buttons (0 to 9)**
   Use to enter the number (page 18).

5. **CLEAR**
   Use to clear the programmed play (page 19).

6. **Control buttons**
   - **DISPLAY**
     Press to change the display for songs playing back from CD or USB (page 20).
   - **FOLDER**
     Use to select the folder of the MP3/WMA disc or USB mass storage device (page 19).
   - **MENU**
     Used when displaying iPod/iPhone menu screen.
   - **MEMORY/PROGRAM**
     Use to memory or program the MP3/WMA disc (page 19).

7. **TUNE +/-, ENTER**
   Use to select/switch system settings and modes, and to confirm actions. Use **TUNE +/-** can be used to find radio frequencies (page 23).

8. **PRESET +/-**
   Use to select preset radio stations (page 24).

9. **MUTE**
   Mutes/unmutes the sound (page 12).

10. **Playback control buttons**
    Use to control each function after you have selected it using the input function buttons (page 17).
Part names and functions

11 Tuner control buttons
ST/MONO
Use to switch the sound mode between stereo and monaural. (page 23)

12 OPEN/CLOSE
Use to open or close the electric slide CD door (page 17).

13 Sound control buttons
Adjust the sound quality (page 13).

14 RANDOM
Randomize order of track playback from a CD, iPod or USB (page 18).

15 REPEAT
Press to change the repeat play setting from a CD, iPod or USB (page 18).

16 Volume control buttons
Use to set the listening volume (page 12).

17 DIMMER
Dims or brightens the display. The brightness can be controlled in four steps (page 12).

Note
- The RDS buttons are not available for this unit.
- The OPTION buttons are not available for this unit.

Hang from the wall to use
When hanging the unit from a wall, firmly screw the wall hanging screws (sold separately) into the wall, and confirm that the wall is capable of holding the unit safely. If the materials or strength of the wall cannot support the weight of the unit, then there is the possibility of the unit falling off.

1. Screw the wall hanging screws into the wall, putting them the specified attachment measurement (130 mm) apart.

2. Insert the wall hanging screws into the lock holes.

3. Slide to the left to secure in place. (Slide distance is around 10 mm)

Note
- When attaching the unit to the wall, there is the possibility of it falling depending on how it is attached. Take due care to avoid any accidents.
- Select a location for the placement/installation of unit that is sufficiently strong enough to hold the weight of the unit. If you do not know the strength etc. of the wall, then consult with a professional.
- The company bears no responsibility for accidents or damages caused by inadequate installation/attachment, incorrect use, modifications, natural disasters etc.
- Place all cables along the wall to prevent anyone from tripping over them.
**Part names and functions**

**Front panel**

1. **Electric slide CD door**
   - Receives the signals from the remote control.

2. **Remote sensor**
   - Receives the signals from the remote control.

3. **Main display**

4. **Display panel**

5. **POWER ON indicator**
   - Lit when the power is on, this indicator lights.

6. **TIMER indicator**
   - Lit when the unit power is off but when the timer setting is activated.

7. **Speaker**

8. **USB terminal**
   - Use to connect your USB mass storage device or Apple iPod/iPhone/iPad as an audio source (pages 15 and 21).

9. **AUDIO IN socket**
   - Use to connect an auxiliary component using a stereo minijack cable (page 25).

10. **Headphone socket**
    - Use to connect headphones. When the headphones are connected, there is no sound output from the speakers (page 14).
# Part names and functions

## Top panel/Rear panel

1. **STANDBY/ON button**
   Switches the receiver between standby and on (page 12).

2. **INPUT button**
   Selects the input source.

3. **BT AUDIO button**
   Used when playing back music from a device with Bluetooth functionality (page 26).

4. **Playback control buttons**
   Select the desired track or file to be played back. Stop current playback. Stop playback or resume playback from the point where it was paused.

5. **VOLUME –/+**
   Use to set the listening volume (page 12).

6. **Disc tray open/close button**
   Use to open or close the electric slide CD door (page 17).

7. **DC IN terminal**
   Plug the supplied AC adapter (page 11).

8. **FM antenna socket**
   Connect provided FM wire antenna here (page 11).
**Chapter 3: Connections**

**Connecting antenna**
Connect the FM wire antenna as shown below. To improve reception and sound quality, connect external antennas (see *Using external antennas* below).

1. **Connect the FM wire antenna into the FM antenna socket.**
   For best results, extend the FM antenna fully and fix to a wall or door frame. Don’t drape loosely or leave coiled up.

**Using external antennas**
To improve FM reception
Use a PAL connector (not supplied) to connect an external FM antenna.

**Plugging in**

**CAUTION**
- Do not use any power cord other than the one supplied with this unit.
- Do not use the supplied power cord for any purpose other than that described below.
- The cord on the AC adapter is 1.5 m long. Make sure that the body of the AC adapter is not suspended off the ground during use, as this will place unnecessary force on the DC plug.

- When inserting the AC adapter into a wall socket, make sure that there is no gap between the AC adapter and the wall socket. Such a gap may cause a poor connection, and metal items like coins or paperclips falling into it may cause a short circuit and start a fire.

Connect the AC adaptor into a wall socket. Only connect the AC adapter when all other connections to the unit have been completed.
Chapter 4: Getting started

To turn the power on
Press the STANDBY/ON to turn the power on.

After use:
Press the STANDBY/ON to enter the power stand-by mode.

Note
• In standby mode, if iPod/iPhone/iPad is connected, the unit turns charge mode.

Setting the clock

1 Press STANDBY/ON to turn the power on.
2 Press CLOCK/TIMER on the remote control. “CLOCK” is shown on the main display.
3 Press ENTER.
4 Press ←/→ to set the day, then press ENTER.
5 Press ←/→ to set the hour, then press ENTER.
6 Press ←/→ to set the minute, then press ENTER to confirm.
7 Press ENTER.

To confirm the time display:
Press the CLOCK/TIMER. The time display will appear for about 10 seconds.

To readjust the clock:
Perform “Setting the clock” from step 1.

Note
• When power supply is restored after unit is plugged in again or after a power failure, reset the clock.

General control

Input function
When the INPUT on main unit is pressed, the current function will change to different mode. Press the INPUT repeatedly to select desired function.

CD → FM → USB/IPOD

↑ AUDI0 IN ← BT AUDIO

Display brightness control
Press DIMMER to dims the display brightness. The brightness can be controlled in four steps.

Volume auto setting
If you turn off and on the main unit with the volume set to 31 or higher, the volume starts at 30 and sets in to the last set level.

Volume control
Press the VOLUME +/– on the unit or press VOLUME +/– on the remote control to increase or decrease the volume.

CAUTION
• The sound level at a given volume setting depends on speaker efficiency, location, and various other factors. It is advisable to avoid exposure to high volume levels. Do not turn the volume on to full at switch on. Listen to music at moderate levels. Excessive sound pressure from earphones and headphones can cause hearing loss.

Muting
The volume is muted temporarily when pressing the MUTE on the remote control. Press again to restore the volume.
Getting started

Sound controls

**Equalizer**
When the **EQUALIZER** is pressed, the current mode setting will be displayed. To change to a different mode, press the **EQUALIZER** repeatedly until the desired sound mode appears.

- **FLAT**: A flat and basic sound.
- **ACTIVE**: A powerful sound that emphasizes low and high tones.
- **DIALOGUE**: A sound that allows the radio or vocals to be heard more easily.
- **NIGHT**: A sound that can be enjoyed at night even with lower volume.

**P.BASS control**
When the power is first turned on, the unit will enter the **P.BASS** mode which emphasizes the bass frequencies. To cancel the **P.BASS** mode, press the **P.BASS** on the remote control.

**Bass/treble control**
Press the **BASS/TREBLE** then press **↑/↓/↔/↕** to adjust the bass or treble.

**Note**
- The **EQUALIZER** and **P.BASS** cannot operate simultaneously. The most recently selected of these two functions will be the one used.
- **BASS/TREBLE** can operate alongside either the **EQUALIZER** or **P.BASS**.

When one of the above two functions is selected, the function that is not selected will be displayed as follows.

1. **When P.BASS setting (ON/OFF) is changed**
   - **EQUALIZER**: FLAT
2. **When EQUALIZER setting is changed**
   - **P.BASS**: OFF

Setting the wake-up timer

**Used to change the existing timer setting, or to set a new timer.**

1. Press **STANDBY/ON** to turn the power on.
2. Press and hold **CLOCK/TIMER**.
3. Press **↔/↕** to select “ONCE” or “DAILY”, then press **ENTER**.
   - **ONCE**: Works once only at a preset time.
   - **DAILY**: Works at the preset time on a preset day.
4. Press **↔/↕** to select “TIMER SET”, then press **ENTER**.
5. Press **↔/↕** to select the timer playback source, then press **ENTER**.
   - **CD**, **FM**, **USB/IPOD**, **BT AUDIO** and **AUDIO IN** can be selected as the playback source.
6. Press **↔/↕** to select the timer day, then press **ENTER**.
7. Press **↔/↕** to set the hour, then press **ENTER**.
8. Press **↔/↕** to set the minute, then press **ENTER**.
9. Adjust the volume press **VOLUME +/−**, then press **ENTER**.
10. Press **STANDBY/ON** to enter the power standby mode.
    - The **TIMER** indicator lights up.
Getting started

Calling the wake-up timer
An existing timer setting can be reused.
1 Follow steps 1 to 3 in “Setting the wake-up timer”.
2 Press \( \mathcal{F}/\mathcal{B} \) to select “TIMER ON”, then press ENTER.

Cancelling the wake-up timer
Turn off the timer setting.
1 Follow steps 1 to 3 in “Setting the wake-up timer”.
2 Press \( \mathcal{F}/\mathcal{B} \) to select “TIMER OFF”, then press ENTER.

Using the wake-up timer
1 Press \( \mathcal{O} \) STANDBY/ON to turn the power off.
2 At the wake-up time, this unit will turn on automatically and play the selected input function.

Note
• If at the wake-up time an iPod/iPhone/iPad is not connected to the unit or a disc is not inserted, the unit will be turned on but will not play back the track.
• Some discs may not be played automatically at the wake-up time.
• When setting the timer set at least one minute between the start and end time.

Using the sleep timer
The sleep timer switches off the unit after a specified time so you can fall asleep without worrying about it.
1 Press SLEEP repeatedly to select a switch off time.
Choose between 10 min, 20 min, 30 min, 60 min, 90 min, 120 min, 150 min, 180 min or OFF. The newly set value displays for 3 seconds, and then the setting is completed.

Note
• The sleep timer can be set by pressing SLEEP while the remaining time is displayed.

Using Headphones
Connect the headphones plug to the PHONES terminal. When the headphones are connected, there is no sound output from the speakers.

Note
• Do not turn the volume on to full at switch on and listen to music at moderate levels. Excessive sound pressure from earphones and headphones can cause hearing loss.
• Before plugging in or unplugging the headphone, reduce the volume.
• Be sure your headphone has a 3.5 mm diameter plug and impedance between 16 \( \Omega \) and 50 \( \Omega \). The recommended impedance is 32 \( \Omega \).
Chapter 5: iPod/iPhone/iPad playback

Merely by connecting your iPod/iPhone/iPad to this unit, you can enjoy high-quality sound from your iPod/iPhone/iPad. Playback setting for iPod/iPhone/iPad music can be performed from this unit or the iPod/iPhone/iPad itself.

Confirming what iPod/iPhone/iPad models are supported

**Note**
- Pioneer does not guarantee that this unit plays iPod/iPhone/iPad models other than the ones specified.
- Some functions may be restricted depending on the model or software version.
- iPod/iPhone/iPad is licensed for reproduction of non-copyrighted materials or materials the user is legally permitted to reproduce.
- Features such as the equalizer cannot be controlled using this system, and we recommend switching the equalizer off before connecting.
- Pioneer cannot under any circumstances accept responsibility for any direct or indirect loss arising from any inconvenience or loss of recorded material resulting from iPod/iPhone/iPad failure.
- For detailed instructions on using the iPod/iPhone/iPad, please refer to the manual supplied with the iPod/iPhone/iPad.
- This system has been developed and tested for the software version of iPod/iPhone/iPad indicated on the website of Pioneer (http://pioneer.jp/homeav/support/ios/aos).
- Installing software versions other than indicated on the website of Pioneer to your iPod/iPhone/iPad may result in incompatibility with this system.

Connecting iPod/iPhone/iPad using supplied iPad stand

1. Connect the iPod/iPhone/iPad cable to the USB terminal on the front of the unit.
2. Pass the iPod/iPhone/iPad cable through the bottom of the stand and connect it to the iPod/iPhone/iPad.
3. Set the iPod/iPhone/iPad on the stand.
Playing iPod/iPhone/iPad

1. Connect your iPod/iPhone/iPad.
   - If an iPod/iPhone/iPad is connected while the unit is turned on, playback of the iPod/iPhone/iPad will not begin.

2. Press USB as the input source. “USB/iPod” is shown on the main display.

3. When the recognition is completed, will begin playing automatically.

Note
- For detailed instructions on using the iPod/iPhone/iPad, please refer to the manual supplied with the iPod/iPhone/iPad.
- iPod/iPhone/iPad recharging occurs whenever an iPod/iPhone/iPad is connected to this unit. (This function is supported in standby mode as well.)
- When input is switched from iPod to another function, iPod/iPhone/iPad playback is temporarily stopped.
- When iPod/iPhone/iPad is not playing and no operations have been performed for more than 20 minutes, the unit will automatically power off.
- Auto power off can be switched to ON/OFF (page 34).

Important
If this unit cannot play your iPod/iPhone/iPad, perform the following troubleshooting checks:
- Check whether the iPod/iPhone/iPad is supported by this unit.
- Reconnect the iPod/iPhone/iPad to the unit. If this doesn’t seem to work, try resetting your iPod/iPhone/iPad.
- Check that iPod/iPhone/iPad software is supported by the unit.

If the iPod/iPhone/iPad cannot be operated, check the following items:
- Is the iPod/iPhone/iPad connected correctly? Reconnect the iPod/iPhone/iPad to the unit.
- Is the iPod/iPhone/iPad experiencing a hangup? Try resetting the iPod/iPhone/iPad, and reconnect it to the unit.
Chapter 6:

Disc playback

This system can play back a standard CD, CD-R/RW in the CD format and CD-R/RW with MP3 or WMA files, but cannot record on them. Some audio CD-R and CD-RW discs may not be playable due to the state of the disc or the device that was used for recording.

**MP3:**
MP3 is a form of compression. It is an acronym which stands for MPEG Audio Layer 3. MP3 is a type of audio code which is processed by significant compression from the original audio source with very little loss in sound quality.
- This system supports MPEG-1/2 Audio Layer 3 (Sampling rates: 8 kHz to 48 kHz; Bit rates: 32 kbps to 320 kbps).
- During VBR file playback, time counter in the display may differ from its actual playback time.

**WMA:**
WMA (Windows Media Audio) files are Advanced System Format files that include audio files which are compressed with Windows Media Audio codec. WMA is developed by Microsoft as an audio format file for Windows Media Player.
- This system supports WMA (Sampling rates: 32 kHz/44.1 kHz/48 kHz; Bit rates: 64 kbps to 320 kbps).
- During VBR file playback, time counter in the display may differ from its actual playback time.

### Playing discs or files

1. Press **STANDBY/ON** to turn the power on.
2. Press **CD** on the remote control or **INPUT** repeatedly on the main unit to select CD input.
3. Press **OPEN/CLOSE** to open the electric slide CD door.
4. Insert the disc.
   - Insert the disc with the printed label facing outward (you can see it).
   - Insert the disc while pressing down on it until the centre of the disc is held in place (until you hear a clicking sound).
5. Press **OPEN/CLOSE** to close the electric slide CD door.
6. Press **I** to start playback.

### Various disc functions

<table>
<thead>
<tr>
<th>Function</th>
<th>Main unit</th>
<th>Remote control</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Play</td>
<td>[ ]</td>
<td>[ ]</td>
<td>Press in the stop mode.</td>
</tr>
<tr>
<td>Stop</td>
<td>[ ]</td>
<td>[ ]</td>
<td>Press in the playback mode.</td>
</tr>
<tr>
<td>Pause</td>
<td>[ ]</td>
<td>[ ]</td>
<td>Press in the playback mode.</td>
</tr>
<tr>
<td>Track up/down</td>
<td>[I]</td>
<td>[ ]</td>
<td>Press in the playback or stop mode. If you press the button in the stop mode, press [ ] to start the desired track.</td>
</tr>
<tr>
<td>Fast forward/reverse</td>
<td>[II]</td>
<td>[ ]</td>
<td>Press and hold down in the playback mode. Release the button to resume playback.</td>
</tr>
</tbody>
</table>

### CAUTION
- Do not touch the lens.
- Be careful not to get your hand or headphone cable caught when opening and closing the slide door.
- Do not insert two or more discs into the disc tray at once.
- Do not play discs of special shapes (heart, octagon, etc.). It may cause malfunctions.
- Do not touch the electric slide CD door when it is moving.
- If power is lost while the electric slide CD door is open, wait until the power is restored.

### Note
- Due to the structure of the disc information, it takes longer to read an MP3/WMA disc than a normal CD (approximately 20 to 90 seconds).
- When the beginning of the first track is reached during fast reverse, the unit will enter the playback mode (only for CD).
- If TV or radio interference occurs during CD operation, move the unit away from the TV or radio.

### Tip
- When no operation has done in CD mode and the audio file is not played for more than 20 minutes, the power will automatically turn off.
- Auto power off can be switched to **ON/OFF** (page 34).

After the last track is played, the unit will stop automatically.
Disc playback

Advanced CD or MP3/WMA disc playback

Direct track search
By using the numeric buttons, the desired tracks on the current disc can be played.

Use the numeric buttons on the remote control to select the desired track whilst playing the selected disc.

Note
- A track number higher than the number of tracks on the disc cannot be selected.

To stop playback:
Press ■.

Repeat play
Repeat play can play one track, all tracks or a programmed sequence continuously.

To repeat one track:
Press REPEAT repeatedly until “RPT ONE” appears. Press ENTER.

To repeat all tracks:
Press REPEAT repeatedly until “RPT ALL” appears. Press ENTER.

To repeat desired tracks:
Perform steps 1 to 5 in “Programmed play (CD or MP3/WMA)” section on next page and then press REPEAT repeatedly until “RPT ALL” appears. Press ENTER.

To cancel repeat play:
Press REPEAT repeatedly until “RPT OFF” appears. Press ENTER.

Note
- After performing repeat play, be sure to press ■. Otherwise, the disc will play continuously.
- During repeat play, random play is not possible.

Random play
The tracks on the disc can be played in random order automatically.

To random play all tracks:
Press RANDOM repeatedly until “RDM ON” appears. Press ENTER.

To cancel random play:
Press RANDOM repeatedly until “RDM OFF” appears. Press ENTER.

Note
- In random play, the unit will select and play tracks automatically. (You cannot select the order of the tracks.)
- During random play, repeat play is not possible.
**Programmed play (CD or MP3/WMA)**

You can choose up to 32 selections for playback in the order you like.

1. Whilst in the stop mode, press MEMORY/PROGRAM on the remote control to enter the programming save mode.

2. Press \(<\) \(\rightarrow\) \(\uparrow\) \(\downarrow\) or the numeric buttons on the remote control to select the desired tracks.

3. Press ENTER to save folder and track number.

4. Repeat steps 2 to 3 for other folder/tracks.

   Up to 32 tracks can be programmed.

   - If you want to check the programmed tracks, press MEMORY/PROGRAM.
   - If you make a mistake, the last programmed tracks will be canceled by pressing CLEAR.

5. Press \(||\) to start playback.

**To cancel the programmed play mode:**

To cancel the programmed play, press \(||\) twice on the remote control. The display will show “PRG CLR” and all the programmed content will be cleared.

**Adding tracks to the program:**

Press the MEMORY/PROGRAM. Then follow steps 2 to 3 to add tracks.

**Note**

- When a disc is ejected anything programmed is cleared.
- If you press the \(\odot\) STANDBY/ON to enter the standby mode or change the function from CD to another, the programmed selections will be cleared.
- During the program operation, random play is not possible.

**About downloading MP3/WMA**

There are many music sites on the internet that you can download MP3/WMA music files. Follow the instructions from the website on how to download the music files. You can then play back these downloaded music files by burning them to a CD-R/RW disc.

- Your downloaded song/files are for personal use only. Any other usage of the song without owner’s permission, is against the law.

**About folder playback order**

If MP3/WMA files are recorded in several folders, a folder number will be set to each folder automatically.

These folders can be selected by the FOLDER on the remote control. If there is no supported file formats inside the selected folder, the folder is skipped and the next folder will be selected.

Example: How the folder numbers are assigned if MP3/WMA format files are recorded are as shown below.

1. ROOT folder is set as FOLDER 1.
2. As for folders inside ROOT folder (FOLDER A and FOLDER B), the folder which is recorded earlier on the disc will be set as FOLDER 2 and FOLDER 3.
3. As for folder inside FOLDER A (FOLDER C and FOLDER D), the folder which is recorded earlier on the disc will be set as FOLDER 4 and FOLDER 5.
4. FOLDER E that is inside FOLDER D will be set as FOLDER 6.

   - The folder and file order information which is recorded on the disc depends on the writing software. There maybe possibilities that this unit will playback the files not according to our expected playback order.
   - From a disc with MP3/WMA files up to 255 folders and 999 files (including non playable files) can be read.

```
ROOT (FOLDER 1)  FOLDER A (FOLDER 2)  FOLDER C (FOLDER 4)  FILE 3
   |                  |                  |                  |
   FOLDER B (FOLDER 3)  FOLDER D (FOLDER 5)  FILE 4  FILE 5
   |                                      |                  |
   |                                      FILE 6  FILE 7  FILE 8
   |                                      |                  |
   |                                      FOLDER E  FILE 9 (FOLDER 6)  FILE 10
   |                                      |                  |
   |                                      |                  FILE 1  FILE 2
```

**About downloading MP3/WMA**

There are many music sites on the internet that you can download MP3/WMA music files. Follow the instructions from the website on how to download the music files. You can then play back these downloaded music files by burning them to a CD-R/RW disc.

- Your downloaded song/files are for personal use only. Any other usage of the song without owner’s permission, is against the law.

**About folder playback order**

If MP3/WMA files are recorded in several folders, a folder number will be set to each folder automatically.

These folders can be selected by the FOLDER on the remote control. If there is no supported file formats inside the selected folder, the folder is skipped and the next folder will be selected.

Example: How the folder numbers are assigned if MP3/WMA format files are recorded are as shown below.

1. ROOT folder is set as FOLDER 1.
2. As for folders inside ROOT folder (FOLDER A and FOLDER B), the folder which is recorded earlier on the disc will be set as FOLDER 2 and FOLDER 3.
3. As for folder inside FOLDER A (FOLDER C and FOLDER D), the folder which is recorded earlier on the disc will be set as FOLDER 4 and FOLDER 5.
4. FOLDER E that is inside FOLDER D will be set as FOLDER 6.

   - The folder and file order information which is recorded on the disc depends on the writing software. There maybe possibilities that this unit will playback the files not according to our expected playback order.
   - From a disc with MP3/WMA files up to 255 folders and 999 files (including non playable files) can be read.
Specify the folder to play
To specify the folder to play, perform the following steps.

1. Press CD, and load an MP3/WMA disc.
2. Press FOLDER, and press \[\uparrow/\downarrow\] to select desired playback folder.
3. Press ENTER.
Playback will start from the first song of the selected folder.
   - Even if it is stopped, it is possible to press \[\uparrow/\downarrow\], to select a folder.

Switch the display contents
1. Press DISPLAY.
If the title, artist and album name has been written to the file, that information will be displayed. (The unit can only display alphanumeric characters. Non-alphanumeric characters are displayed as "**").

- Number of track, playback time display
- Title/Artist/Album display
- File type display
- Number of folder/track display

Note
- "Copyright protected WMA files" or "Unsupported files" cannot be played back. In these case the files will be skipped automatically.
- There may be cases where no information can be displayed.
- Displaying title, artist and album name is only supported for MP3 files.
Chapter 7:  
USB playback

Playing USB storage devices
It is possible to listen to two-channel audio using the USB interface on the front of this receiver.

- Pioneer does not guarantee that any file recorded on a USB storage device will play or that power will be supplied to a USB storage device. Also note that Pioneer will accept no responsibility whatsoever for loss of files on USB storage devices caused by connection to this unit.

1 Press USB as the input source.
   “USB/IPOD” is shown on the main display.

2 Connect the USB storage device.
The number of folders or files stored on the connected USB storage device appear on the main display automatically.

- This receiver does not support a USB hub.
- If an iPod/iPhone/iPad is connected to the unit, the unit will automatically begin charging it.

3 When the recognition is completed, press ▶II to start playback.
   When changing to a different input source, stop the USB memory playback first, before changing.

4 Disconnect USB storage device from the USB terminal.
Turn the power off before removing the USB storage device.

Repeat play
Repeat play can play one track, all tracks or a programmed sequence continuously.

To repeat one track:
Press REPEAT repeatedly until “RPT ONE” appears. Press ENTER.

To repeat all tracks:
Press REPEAT repeatedly until “RPT ALL” appears. Press ENTER.

To repeat desired tracks:
Perform steps 1 to 5 in “Programmed play (CD or MP3/WMA)” section on next page and then press REPEAT repeatedly until “RPT ALL” appears. Press ENTER.

To cancel repeat play:
Press REPEAT repeatedly until “RPT OFF” appears. Press ENTER.

Note
- After performing repeat play, be sure to press ■. Otherwise, the file of USB storage device will play continuously.
- During repeat play, random play is not possible.

Random play
The file of USB storage device can be played in random order automatically.

To random play all tracks:
Press RANDOM repeatedly until “RDM ON” appears. Press ENTER.

To cancel random play:
Press RANDOM repeatedly until “RDM OFF” appears. Press ENTER.

Note
- In random play, the unit will select and play tracks automatically. (You cannot select the order of the tracks.)
- During random play, repeat play is not possible.
USB playback

Specify the folder to play
To specify the folder to play, perform the following steps.

1. Press USB, and connect the USB storage device.

2. Press FOLDER, and press ↑/↓ to select desired playback folder.

3. Press ENTER.
   Playback will start from the first song of the selected folder.
   • Even if it is stopped, it is possible to press ↑/↓ to select a folder.

Switch the display contents
The unit can display the information recorded in the USB storage device. For details, see Switch the display contents on page 20.

Playing in the desired order
(Programmed Play)
The unit can play folders stored on a USB storage device in the desired order. For details, see Programmed play (CD or MP3/WMA) on page 19.
Chapter 8:
Using the tuner

Listening to the radio broadcasts
The following steps show you how to tune in to FM radio broadcasts using the automatic (search) and manual (step) tuning functions. Once you are tuned to a station you can memorize the frequency for recall later. See Saving station presets below for more on how to do this.

Tuning
1 Press the STANDBY/ON to turn the power on.
2 Press TUNER.
3 Press TUNE +/- on the remote control to tune in to the desired station.

Automatic tuning:
Press and hold TUNE +/-, scanning will start automatically and the tuner will stop at the first receivable broadcast station.

Manual tuning:
Press the TUNE +/- repeatedly to tune in to the desired station.

Note
• When radio interference occurs, automatic tuning may stop automatically at that point.
• Automatic tuning will skip weak signal stations.
• To stop the automatic tuning, press ■.

To receive an FM stereo transmission:
• Press ST/MONO to select stereo mode and “AUTO” will be displayed.

Improving poor FM reception:
1 Press ST/MONO repeatedly to select MONO.
This will change the tuner from stereo to mono and usually improve the reception.

Saving station presets
If you often listen to a particular radio station, it’s convenient to have the receiver store the frequency for easy recall whenever you want to listen to that station (Preset tuning). This saves the effort of manually tuning in each time. This unit can memorize up to 30 stations.

1 Tune to a station you want to memorize.
See Tuning above for more on this.
2 Press MEMORY/PROGRAM.
The preset number will flash.
3 Press PRESET +/- to select the preset channel number.
4 Press MEMORY/PROGRAM to store that station in memory.
If the preset number has changed from flashing to lighting, before the station is memorised, repeat the operation from step 2.
• Repeat steps 1 to 4 to set other stations, or to change a preset station. When a new station is stored in the memory, the station previously memorised for that preset channel number will be erased.

Note
• The backup function protects the memorised stations for a few hours should there be a power failure or the AC power cord become disconnected.
Using the tuner

To recall a memorised station
1 Press PRESET +/- to select the desired station.

To scan the preset stations
The stations saved in the memory can be scanned automatically. (Preset memory scan)
1 Press and hold PRESET +/-.
The preset number will appear and the programmed stations will be tuned in sequentially, for 5 seconds each.
2 Press PRESET +/- again when the desired station is located.

To erase entire preset memory
1 Press TUNER on the remote control.
2 Press CLEAR until “MEM CLR” appears.

Note
• All stations will be erased.
Chapter 9: Other connections

**CAUTION**
- Before making or changing the connections, switch off the power and disconnect the power cord from the AC outlet.

**Connecting auxiliary components**

Connect the front panel AUDIO IN mini-plug jack to your auxiliary playback component.
- This method can be used to play music on this unit from iPod/iPhone/iPad that do not support use of an USB terminal.

1. Switch input by pressing the INPUT on the main unit or the AUDIO IN on the remote control. When INPUT is selected “AUDIO IN” will be displayed on the main display.

**Note**
- If the AUDIO IN mini-plug jack is connected to auxiliary phones jack, the volume of the unit will be adjusted by the volume on the playback component. If the sound is distorted after you lower the volume of the unit, try lowering the volume on the auxiliary playback component.
Chapter 10: Bluetooth® Audio playback

Music playback using Bluetooth wireless technology

The unit is capable of playing back music stored on Bluetooth capable devices (cell phones, digital music players etc.) wirelessly. You can also use a Bluetooth audio transmitter (sold separately) to enjoy music from devices that do not have Bluetooth functionality. Please refer to the user’s manual for your Bluetooth capable device for more details.

Note
- The Bluetooth word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by PIONEER CORPORATION is under license. Other trademarks and trade names are those of their respective owners.
- The Bluetooth wireless technology enabled device must support A2DP profiles.
- Pioneer does not guarantee proper connection and operation of this unit with all Bluetooth wireless technology enabled devices.

Remote control operation
The remote control supplied with this unit allows you to play and stop media, and perform other operations.

Pairing with the unit (Initial registration)
In order for the unit to playback music stored on a Bluetooth capable device, pairing must first be performed. Pairing should be performed when first using the unit with the Bluetooth capable device, or when the pairing data on the device has been erased for any reason.

1. Press the STANDBY/ON and turn the power to the unit on.

2. Press the BT AUDIO.

3. Turn on the power to the Bluetooth capable device that you wish to pair with, and perform pairing procedure on it.

Note
- This unit will be displayed as "X-SMC01" on all Bluetooth capable devices that you have. Pairing will start.
- Please refer to the user’s manual for your Bluetooth capable device for details on when pairing can be performed and the procedures required for pairing.
- When PIN code entry is requested, enter "0000". (This unit does not accept any PIN code setting other than '0000'.)
Confirm on the Bluetooth capable device
that pairing has been completed.
If pairing with the Bluetooth capable device has been
completed correctly, the name of the Bluetooth capable
device will be displayed on the front panel of the unit. (Only
single-byte alphanumeric characters can be displayed. Any
character that cannot be displayed will be indicated by a “*”.)

Listen to music on the unit from a Bluetooth capable device

1. Press the BT AUDIO.
The unit will switch to BT AUDIO input.

2. A Bluetooth connection will be created between the Bluetooth capable device and the unit.
Procedures for connecting to the unit should be performed from the Bluetooth capable device.
• Please refer to the user's manual for your Bluetooth capable device for details of the connection procedures.

3. Playback music from the Bluetooth capable device.

Note
• When Bluetooth capable device is not playing and no operations have been performed for more than 20 minutes, the unit will automatically power off.
• Auto power off can be switched to ON/OFF (page 34).

BT STANDBY
The following can be done when the unit is on standby with the BT AUDIO switched ON.
By selecting a Bluetooth capable device that already has a connection history (pairing has already been conducted) with this unit, this unit will automatically turn on with the BT AUDIO function.

BT STANDBY settings
Switch ON/OFF by long pressing the BT AUDIO button located on the top of the unit for 3 seconds.
The setting operation can only be performed by using the BT AUDIO button on the unit. The setting cannot be performed using the remote control.

Note
• When the BT STANDBY is ON, “BT STANDBY ON” is displayed on the main display.
• When the BT STANDBY is OFF, “BT STANDBY OFF” is displayed on the main display.

Connection while in BT STANDBY mode with Bluetooth capable device

When connection history (pairing has already been conducted) with a Bluetooth capable device exists for the unit during BT STANDBY, the unit can receive a connection request directly from the connection history.
The unit will start using the BT AUDIO function, and connect with a Bluetooth capable device.

Even devices that have already been paired with this unit will not connect during BT STANDBY in the following cases.
In such cases, delete pairing history from the Bluetooth wireless technology device and perform pairing again.
• Up to 8 pairing history can be recorded with this unit. If connecting to a Bluetooth wireless technology device over 8 units, the oldest pairing history will be deleted.
• If the settings are reset to the factory setting, all pairing history will be deleted.

Radio wave caution
This unit uses a 2.4 GHz radio wave frequency, which is a band used by other wireless systems (see list below). To prevent noise or interrupted communication, do not use this unit nearby such devices, or make sure these devices are switched off during use.
• Cordless phones
• Cordless facsimiles
• Microwave ovens
• Wireless LAN devices (IEEE802.11b/g)
• Wireless AV equipment
• Wireless controllers for game systems
• Microwave-based health aids
• Some baby monitors
Other, less common, equipment that may operate on the same frequency:
• Anti-theft systems
• Amateur radio stations (HAM)
• Warehouse logistic management systems
• Discrimination systems for train or emergency vehicles

Note
• In the event noise appears in your television image, there is the possibility that a Bluetooth wireless technology enabled device or this unit (including products supported by this unit) are causing signal interference with the antenna input connector of your television, video, satellite tuner, etc. In this event, increase the distance between the antenna input connector and the Bluetooth wireless technology enabled device or this unit (including products supported by this unit).
Bluetooth® Audio playback

- If there is something obstructing the path between this unit (including devices supported by this unit) and the device equipped with Bluetooth wireless technology (such as a metal door, concrete wall, or insulation containing tinfoil), you may need to change the location of your system to prevent signal noise and interruptions.

**Scope of operation**

Use of this unit is limited to home use. (Transmission distances may be reduced depending on communication environment).

In the following locations, poor condition or inability to receive radio waves may cause the audio to be interrupted or stopped:

- In reinforced concrete buildings or steel framed or iron-framed buildings.
- Near large metallic furniture.
- In a crowd of people or near a building or obstacle.
- In a location exposed to the magnetic field, static electricity or radio wave interference from radio communication equipment using the same frequency band (2.4 GHz) as this unit, such as a 2.4 GHz wireless LAN device (IEEE802.11b/g) or microwave oven.
- If you live in a heavily populated residential area (apartment, townhouse, etc.) and if your neighbor’s microwave is placed near your system, you may experience radio wave interference. If this occurs, move your unit to a different place. When the microwave is not in use, there will be no radio wave interference.

**Radio wave reflections**

The radio waves received by this unit include the radio wave coming directly from the device equipped with Bluetooth wireless technology (direct wave) and waves coming from various directions due to reflections by walls, furniture and building (reflected waves). The reflected waves (due to obstacles and reflecting objects) further produce a variety of reflected waves as well as variation in reception condition depending on locations. If the audio cannot be received properly due to this phenomenon, try moving the location of the device equipped with Bluetooth wireless technology a little. Also note that audio may be interrupted due to the reflected waves when a person crosses or approaches the space between this unit and the device equipped with Bluetooth wireless technology.

**Precautions regarding connections to products supported by this unit**

- Complete connections for all devices supported by this unit, including all audio cords and power cables before connecting them to this unit.
- After completing connections to this unit, check the audio and power cables to confirm that they not twisted together.
- When disconnecting this unit, confirm that you have sufficient working space in the surrounding area.
- When changing connections of audio or other cables for products supported by this unit, confirm that you have sufficient working space in the surrounding area.
Chapter 11: Additional information

Troubleshooting
Incorrect operations are often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Investigate the other components and electrical appliances being used. If the trouble cannot be rectified even after exercising the checks listed below, ask your nearest Pioneer authorized service center or your dealer to carry out repair work.

- If the unit does not operate normally due to external effects such as static electricity disconnect the power plug from the outlet and insert again to return to normal operating conditions.

General problem

</table>

The panel for the electric slide CD door has fallen off.

It can be attached as follows:
Align the line below the arrow and the bottom of the panel, then slide downward using both hands until you hear a clicking sound.

* The panel is designed to be removable for repairs.

**Note**
- If the panel is not attached correctly, the panel may not open or close properly. It may also cause irregular noise, so make sure the panel is positioned correctly.
- Disconnect from the AC outlet before attaching the panel.
### Additional information

- Only the discs that have been finalized can be played.
- Discs recorded in packet write mode (UDF format) are not compatible with this unit.
- Corporation and product names mentioned herein are trademarks or registered trademarks of the respective corporations.
- Only discs recorded in ISO9660 Level 1, Level 2 and Joliet can be played.
- Files protected by DRM (Digital Rights Management) cannot be played.

**Note**
- This unit does not support multisession discs or multiborder recording.
- Multisession/multiborder recording is a method in which data is recorded on a single disc in two or more sessions/borders. A “session” or “border” is one recording unit, consisting of a complete set of data from lead-in to lead-out.

**Regarding copy protected CDs**
This unit is designed to conform to the specifications of the audio CD format. This unit does not support the playback or function of discs that do not conform to these specifications.

**Supported audio file formats**
- This unit does not support lossless encoding.

**Cautions on use**

**When moving this unit**
When moving this unit, be sure to first check that there is no disc loaded and disconnect the iPod/iPhone/iPad. Then press \( \text{STANDBY/ON} \), wait for “STANDBY” disappears on main display to turn off, then unplug the power cord. Damage may occur if the unit is transported or moved with a disc inserted, or when another device is connected to the USB terminal, or AUDIO IN mini-plug jack.

**Place of installation**
- Choose a stable place near the TV or stereo system being used with this unit.
- Do not place this unit on top of a TV or color monitor. Also install it away from cassette decks and other devices easily affected by magnetic forces.

**Avoid the following locations:**
- Places exposed to direct sunlight
- Humid or poorly ventilated places
- Extremely hot places
- Places exposed to vibrations
- Places in which there is much dust or cigarette smoke
- Places exposed to soot, steam or heat (kitchens, etc.)
Additional information

Do not place objects on this unit
Do not place any objects on top of this unit.
Do not obstruct the ventilation holes.
Do not use this unit on shaggy rugs, beds, sofas, etc., or wrapped in cloth, etc. Doing so will prevent the heat from dispersing, leading to damage.
Do not expose to heat.
Do not place this unit on top of an amplifier or other component that generates heat. When rack mounting it, to avoid the heat given off by the amplifier or other audio component, place it on a shelf below the amplifier.
• Turn off the unit’s power when not using it.
• Depending on signal conditions, striped patterns may appear on a TV screen and noise may enter the sound of radio broadcasts when the unit’s power is on. If this happens, turn the unit’s power off.

About condensation
If this unit is moved suddenly from a cold place into a warm room (in winter, for example) or if the temperature in the room in which this unit is installed rises suddenly due to heater operation, etc., water droplets (condensation) may form inside (on operating parts and the lens). When condensation is present, this unit will not operate properly and playback is not possible. Let this unit stand at room temperature for 1 or 2 hours with the power turned on (the time depends on the extent of condensation). The water droplets will dissipate and playback will become possible. Condensation can also occur in the summer if this unit is directly exposed to the air flow from an air-conditioner. If this happens, move this unit to a different place.

Cleaning the product
• Unplug the power cord from the power outlet when cleaning this unit.
• Clean this unit using a soft cloth. For tough dirt, apply some neutral detergent diluted in 5 to 6 parts water to a soft cloth, wring out thoroughly, wipe off the dirt, then wipe again with a soft, dry cloth.
• Alcohol, thinner, benzene, insecticides, etc., could cause the print or paint to peel off. Also, leaving rubber or vinyl products in contact with this unit for long periods of time could mar the cabinet.
• When using chemical-impregnated wipes, etc., read the cautions included with the wipes carefully.

Cleaning the lens
This unit’s lens should not become dirty in normal use, but if for some reason it should malfunction due to dust or dirt, consult your nearest Pioneer authorized service center. Although lens cleaners for players are commercially available, we advise against using them since some may damage the lens.

Handling discs

Storing
• Always place discs in their cases and store them vertically, avoiding hot, humid places, places exposed to direct sunlight and extremely cold places.
• Be sure to read the cautions included with the disc.

Cleaning discs
• Discs may not play if there are fingerprints or dust on them. In this case, use a cleaning cloth, etc., to gently wipe the disc from the inside towards the outside. Do not use dirty cleaning cloths.
• Do not use benzene, thinner or other volatile chemicals. Also do not use record spray or antistatic agents.
• For tough dirt, apply some water to a soft cloth, wring out thoroughly, wipe off the dirt, then wipe off the moisture with a dry cloth.
• Do not use damaged (cracked or warped) discs.
• Do not let the signal surface of discs get scratched or dirty.
• Do not attach pieces of paper or stickers to discs. Doing so could warp discs, making it impossible to play them. Also note that rental discs often have labels attached to them, and the label’s glue may have oozed out. Check that there is no glue around the edges of such labels before using rented discs.

About specially shaped discs
Specially shaped discs (heart-shaped, hexagonal, etc.) cannot be played on this unit. Do not attempt to play such discs, as they could damage this unit.
About iPod/iPhone/iPad

Bluetooth technology works with iPhone 5, iPhone 5s, iPhone 5c, iPhone 4s, iPhone 4, iPhone 3GS, iPhone 3G, iPad (3rd and 4th generation), iPad 2, iPad, iPad mini, and iPod touch (2nd through 5th generation).

USB works with iPhone 5, iPhone 5s, iPhone 5c, iPhone 4s, iPhone 4, iPhone 3GS, iPhone 3G, iPad (3rd and 4th generation), iPad 2, iPad, iPad mini, iPod touch (1st through 5th generation) and iPod nano (3rd through 7th generation).

“Made for iPod,” “Made for iPhone,” and “Made for iPad” mean that an electronic accessory has been designed to connect specifically to iPod, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, iPhone, or iPad may affect wireless performance.

iPad, iPhone, iPod, iPod nano and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Auto power off setting

Long press the ■ on the unit for 3 seconds to switch auto power off setting ON/OFF.

The operation can be conducted using only the ■ on the unit. No need to set this using the remote control.

Initial setting is set to ON.

Note
- When the auto power off is set to ON, “APO ON” will be displayed on the main display.
- When the auto power off is set to OFF, “APO OFF” will be displayed on the main display.

Restoring all the settings to the defaults

Use the steps below to restore the all settings to their defaults.

1. Press STANDBY/ON to turn the power on.
2. Press CD on the remote control or INPUT repeatedly on the main unit to select CD input.
3. Press OPEN/CLOSE to open the electric slide CD door.
4. Press STANDBY/ON while pressing ■.

Use the buttons on this unit’s top panel. “DEFAULT” is displayed while the settings are being restored. Power is turned off.
Specifications

- **Amplifier section**
  RMS Power Output: \(10 \, \text{W} + 10 \, \text{W}\) 
  \((1 \, \text{kHz}, 10\% \, \text{T.H.D.}, 8\, \Omega)\)

- **Tuner section**
  Frequency Range (FM): \(87.5 \, \text{MHz} \, \text{to} \, 108 \, \text{MHz}\)
  Antenna Input (FM): \(75 \, \Omega \) unbalanced

- **Bluetooth**
  Version: Bluetooth Specification Ver. 2.1 + EDR
  Output: Bluetooth Specification Class 2
  Estimated line-of-sight transmission distance*: About 10 m
  Frequency range: 2.4 GHz
  Modulation: FH-SS (Frequency Hopping Spread Spectrum)
  Supported Bluetooth profiles: A2DP, AVRCP
  Supported Codec: SBC (Subband Codec)
  Supported contents protection: SCMS-T
  *The line-of-sight transmission distance is an estimate.
  Actual transmission distances supported may differ depending on surrounding conditions.

- **Miscellaneous**
  USB terminal: 5 V, 2.1 A
  Power source: AC 100 V to 240 V, 50 Hz/60 Hz
  Power consumption
  Power on: 25 W
  Power stand-by: 0.5 W or less
  Dimensions: 430 mm (W) \(\times\) 218 mm (H) \(\times\) 114 mm (D)
  Weight (without package): 2.8 kg

- **Speaker**
  Type: Passive radiator
  Fullrange: 6.6 cm cone
  Passive radiator: 7.7 cm cone
  Playback frequency range: 60 Hz to 20 kHz

- **Accessories**
  Remote control: 1
  AC adapter: 1
  AAA batteries (R03): 2
  FM wire antenna: 1
  iPad stand: 1
  Operating instructions (This document): 1

**Note**
- Specifications and the design are subject to possible modifications without notice, due to improvements.
